Subject: Find Safer Alternatives for the Disposal of Hazardous Chemicals and Explosives at Camp Minden

Dear Colonel Wilson,

I urge you to watch this new VICE video documentary about what the people in Colfax, Louisiana experience on a daily basis due to the hazardous chemical disposal practices at Clean Harbors Colfax. There is no other corporation in America that engages in such barbaric practices and no other state in America besides Louisiana that permits this.

Your announcement on September 12th that you have decided to send even more hazardous chemicals to be open burned and open detonated at Clean Harbors Colfax is of deep concern to me.

I implore you to please reverse your decision and find a safer alternative for the disposal of those hazardous chemicals.

People's lives are at stake!
